PROFESSIONAL SUMMARY

Results-driven **Full Stack Software Engineer** with extensive experience architecting and shipping production-grade multi-portal web applications, SaaS platforms, and secure RESTful APIs. Specializes in building modern React frontends with Tailwind CSS alongside scalable Node.js/Express backends, PostgreSQL schemas with automated database triggers, and Supabase Row-Level Security. Shipped 8+ end-to-end full stack web platforms across healthcare, hospitality, education, real-time collaboration, and e-commerce.

TECHNICAL EXPERTISE

Languages:	JavaScript (ES6+), TypeScript, PHP, SQL, HTML5, CSS3/Sass	Frontend UI:	React.js, Vite, Next.js, Tailwind CSS, Framer Motion, Bootstrap
Backend & APIs:	Node.js, Express.js, RESTful APIs, WebSockets, JWT Auth, Middleware	Databases & Storage:	PostgreSQL, Supabase (RLS), MySQL, Prisma ORM, Cloudinary CDN
Architecture:	Multi-Portal RBAC, Database Triggers, State Management, Responsive Design	DevOps & Tools:	Git, GitHub, Postman, VS Code, Vercel, Render, CI/CD Fundamentals

FEATURED PRODUCTION APPLICATIONS

Luxora Hotels & Resorts <i>Hospitality SaaS</i> React · Vite · Node.js · Express · Supabase · PostgreSQL Full-stack hotel management platform connecting public room booking, guest self-service portal, and operations dashboard with automated checkout triggers.	Clinexa Healthcare <i>Enterprise Health</i> React · Node.js · Express · Supabase · PostgreSQL · Cloudinary Synchronized hospital ecosystem across 9 authenticated portals (Doctor, Patient, Lab, Pharmacy, Admin) with strict Row-Level Security.
Academora <i>School Management</i> React · Tailwind CSS · Node.js · Express · Supabase Unified institution suite coordinating 6 authenticated portals (Student, Teacher, Parent, Admin, Library) for grading, admissions, and tuition billing.	PrepDeck <i>EdTech CBT</i> React · Framer Motion · Node.js · Express · Supabase Full-stack Computer-Based Test practice platform for JAMB & WAEC candidates with 13 subjects, timed mock sessions, and live leaderboard.
LinkUp <i>Real-Time Chat</i> React · Node.js · Express · WebSockets / Socket.io · PostgreSQL High-speed real-time messaging application supporting 1-on-1 DMs, group channels, live member presence, typing indicators, and attachments.	ShopSphere <i>E-Commerce</i> React · Vite · Tailwind CSS · Node.js · REST API High-performance modern e-commerce storefront with instant product search, dynamic filtering, persistent cart, and streamlined checkout.

PROFESSIONAL EXPERIENCE

Full Stack Software Developer <i>Independent Solutions & Client Projects</i> 2024 – Present - Designed and deployed 8+ responsive, high-performance web applications and multi-portal SaaS platforms. - Architected secure RESTful APIs with JWT authentication, role-based access control (RBAC), and database indexing. - Collaborated with clients to translate operational workflows into automated, production-ready software solutions.
Backend & API Developer <i>Software Development Projects</i> 2023 – 2024 - Built robust backend services with Node.js and Express; engineered PostgreSQL relational schemas and automated triggers. - Integrated WebSockets for real-time bidirectional communication and Cloudinary for media asset management.
Frontend Developer <i>Independent Web Development</i> 2022 – 2023 - Engineered responsive, accessible user interfaces using React, Tailwind CSS, JavaScript (ES6+), and Framer Motion. - Optimized client-side rendering, component reusability, and mobile-first responsive layouts.
